SUMMARY

A proactive Informatics student with hands-on experience in large-scale network projects and server implementations, including the Secure Branch rollout for Bank Rakyat Indonesia and the installation of 157 servers for PT Telkomsel. He has proven technical skills in network infrastructure (Fortinet, Mikrotik), and is currently actively exploring programming languages and database management through his study program to complete his skills as a well-rounded IT professional.

WORK EXPERIENCE

Project Implementor (Internship)   January 2023 - May 2023
IP Network Solusindo | South Tanggerang Period internship

- Contributed significantly to the implementation of 157 DELL R750 servers for the Hadoop x86 project at PT Telkomsel Indonesia's TTC BSD site.
- Perform installation and configuration of server operating systems (OS Installation) for project needs
- Assist in the network troubleshooting process to ensure connectivity and smooth project implementation.

Network Technician (Field Work Practice)   April 2022 - June 2022
CCTV SMILE | South Tangerang Period FWP

- Carry out installation and setup of CCTV units at client locations in accordance with operational standards.
- Perform installation and pulling of network cables (CAT 6) for CCTV infrastructure.
- Crimping UTP cables with RJ45 connectors to ensure device connectivity.

Network Engineer (Project-Based)   June2023 - August 2023
PT Pasifik Nusantara | West Jakarta Period Project

- Directly involved in the Secure Branch rollout project for Bank Rakyat Indonesia (BRI).
- Perform configuration and implementation of Fortinet firewall devices (FortiGate) in accordance with project security standards.
- Work closely with the team to ensure network installation and activation at branch locations runs according to schedule.

Education

Bachelor of Information Technology   September 2023 - Now
South Tangerang Institute of Technology

- Informatics engineering
- GPA 3.86/4.00

Portfolio
